# GIT :-

Git will have repositories (top repo's).

These are different types.

Local & remote

* And there are branches.

The default branch is "Master".

* also, Every team will have their own branch. & all the files will be merged to the Master branch by giving the pull request.

1. First from Command prompt we will use git commands. to ~~load~~ the create file "

* Mk dir @< file name>.

* cd < file name>.

* vi < ~~file na~~ file name>.

* git add-file name.

* git status

* git commit -m " committing a new message ".

* git ls-files.

* git log.

* git remote add origin " https: githubacc "

* git push origin master

* git pull origin master
